

# SINKS

WISHES COME TRUE

*Our sinks are made with the same care as a chef makes his best recipe;  
choosing only the best ingredients.*

## RANGE OVERVIEW

*Isink*

*Zenit*

*Linea*

# TEKA

## Packaging and Basket Wastes

### INDIVIDUAL CARTON BOX

Teka sinks presented in individual carton boxes are stamped with the Teka logo and a sticker showing the name of the product and the code number. Inside the box, the sink and the accessories such as basket waste, fixing clips and sealing strips for its installation are included.

Teka always provides the necessary wastes for your sink

### CARDBOARD PROTECTION

It is a comfortable and secure way of packing the sinks for its sale in big stores. Although the sink is not inside a carton box, the protection around the sink perimeter is good enough and it contains the fixing clips and sealing strips. The basket wastes should be ordered apart and are provided separately without extra cost.

Extra accessories and fittings are available under request

### BASKET WASTES WITH OVERFLOW ARE STANDARD FOR ALL TEKA SINKS

Teka sinks are always provided with the necessary basket wastes :

Included inside the box, in case of the carton box sinks.

Under request in case of the sinks packed with cardboard protection (without extra cost). Extra accessories and fittings are also available: refer to pages 66 and 67 in case you want to order extra basket wastes, accessories or fittings for your Teka sink.

### TEKA STAINLESS STEEL SINKS: PERFECT FINISHES

MICROTEXTURIZED

POLISHED

MATT

Teka's stainless steel sinks come in several finishings: matt, polished and microtextured. Satin polished Teka sinks have an enduring easy to clean lustre that is impervious to water stains and calcium deposits. This finishing requires extensive hand and machine buffing. Teka's high range, e.g. the Classic or Cuadro series, features a full bright polished finishing. Micro-textured sinks combine perfectly with the aluminium finishing in the kitchen

# TEKA SINKS

*Quality above all*

**Teka, manufacturing Sinks since 1924**

## TEKA COLOURS

### *Reflection and refraction*

The Teka LED system available for most of the Linea and Radea undermount sinks will change the mood in the kitchen.

This innovative illumination system is based in an acrylic glass frame that incorporates an LED system inside. Operated via remote control, the frame is illuminated and the colour ranges through the whole chromatic spectrum thanks to the selectable intensity and basic colour combinations. This surprising effect achieves even stronger intensity when the colour is reflected along the bowls and the stainless steel panels.

The installation of this device is really easy. The frame must be firmly placed between the rim of the bowl and the worktop and connected using the provided electrical pack. It's recommended to respect a minimum distance of 25 mm from the niche hole to the tap hole.

LED system integrated  
in a  
acrylic frame

Remote control and  
connecting device +  
plug up to 3 frame
