TAPS

The perfect **partner**

Sinks can be described using endless adjectives. They can be robust, elegant, powerful, etc. But, they are nothing without their counterpart: The Tap. From professional to economical ranges, Teka manufactures taps created with imagination and designs them to last. Now, enjoy your time with the perfect kitchen pair.

OPERA ICO 915, sleek stylish line

An exclusive, fresh and state-of-the-art design, focused on making an essential part of the kitchen, the tap, more functional. The revolutionary concept of open spout with its 5 aerators means a significant water saving, optimizing water flow. A tap with personality to fit the style of your kitchen and to add a professional design to it, with its striking look. Nobody will remain indifferent to this tap.

TekaPure®, Purifies water in depth

Water free of impurities, the particles will be trapped in the filter.

- ✓ **Eliminates up to 95% of unpleasant water taste and odour.**
- ✓ Removes the taste of chlorine and organic impurities.
- ✓ **Filter operating capacity: 5800 litres or 1 year.** Average water consumption per family of 4 people = 4.380 l/year (3 l/day per person).
- ✓ **Quick and easy replacement of the cartridge system.**
- ✓ The filter system takes up very little space under the sink, making it suitable for small spaces.
- ✓ Filter cartridge replacement available.
- ✓ **Filter with NSF sanitary certification.** System tested and Certified by NSF International according to ANSI/NSF Standard 42 for reduction of Chlorine Class I, taste and odour.

Overcome barriers

The best place to place the sink and the kitchen tap is in front of the window, if space permits. Opening or closing the window with a high spout tap ahead, is no longer a problem. Aura AUK 983, the single-lever retractable mixer tap from Teka, allows you to hide or extract your high spout whenever necessary so that nothing stumbles in your way. Thanks to its 2 positions, Aura offers maximum flexibility in the kitchen.

Teka ceramic discs

Longer taps life

All Teka cartridges use sintered ceramic discs with high resistance. These discs all have porous surfaces which retain grease longer, helping to achieve smoother, gentler movements which help to prolong the life of the taps. The operating gear is insulated from water giving therefore continuous lubrication.

Ceramic cartridge, Greater durability

Temperature limiter

Save the energy used to heat the water with the temperature regulator that is incorporated into the cartridge.

Water saving

The cartridge incorporates an adjustable flow gauge to save water every time you use the mixer.

Anti-Scalding

Forget about scalding caused by water at high temperatures. We take care of you and your loved ones.

* Not all taps have temperature and flow regulators in the cartridge.

KITCHEN TAPS

NEW
