HUMIDITY CONTROL

Humidity Control technology guarantees the ideal level of humidity, oscillating between 55% - 75%. This ensures the bottle is kept in perfect condition, as well as preserving the aroma of the wine.

DOUBLE TINTED GLASS

The double tinted glass door protects the bottles from light and UV rays, thereby preventing the premature aging of the wine and loss of flavour.

ANTI-VIBRATION SYSTEM

This system absorbs and dampens any vibration, thereby preventing wine fatigue and preserving its flavour.

ACTIVE CARBON FILTER

Designed to constantly renew and purify the air in the wine cellar to achieve the optimal environment for preserving the wine.
