Life is the sum of these moments that surprise us

LAUNDRY
Technology and design combined for your day to day

Feel the soft and smooth touch of your clothes on the skin and enjoy the fresh smell of your laundry. Teka washing machines take the best care of your clothes and bring a unique aroma to your whole home. The smell of freshness you still can remember from every Sunday morning when you were a child. The feeling of wearing brand new clothes that were just washed for the very first time and made you feel better, protected and comfortable to face a new day. Imagine to get such a feeling every time you do your laundry.
**SoftCare Drum**

The easiest way to break water resistance. Taking care of clothes in every washing, keeping the texture of your clothes and softness. The innovating Softcare design of the drum, made of dozens of small cubes, improves the gentle care of your laundry during washing, drying and spinning. Woolmark certificate is an universal quality seal to demonstrate our washers keep your clothes with most of the softness, even after many washings. Feel the freedom of washing your most delicate wool clothes.

**A+++**

Consumption and a lot to offer. New Inverter engines generation have less vibrations and noise and have improved durability, with an A+++ energy classification, a remarkable saving.
Find a wide range of options with the union kit ready to combine all the benefits of the spa washers with the last drying technology.

Heat pump dryer works with less temperature than ordinary dryers, for a gentle care of your laundry. There is no need to reach high temperatures to be efficient and you also save energy; good for you, good for environment.

The union kit can be used with several vertical models to take advantage of the room space. It has a removable tray to fold clothes up to 16kg and helps you out to keep order at home.
More capacity

For those who need more than ordinary capacity, like big families, large clothes, curtains or rugs. Teka has a wide range of washing machines ready for you. The new washer and dryer can wash 10 kg and dry up to 7 kg. Everything in just one appliance with many features, designed to bring harmony to your home.

My cycle

We know each person has different needs. With “my cycle” you can choose your favourite program, changing types of clothes, temperatures, speed, etc. The washing machine memorizes them and it’s done! Find the right program in the control display and feel like this appliance was designed just for you. Because we do know everyone is unique and deserves appliances designed just for them.

Delay programming

We don’t spend as much time at home as we would like to, so we need a little helper at houseworking. You can program Teka washers from 1 to 24 hours. Your laundry will be clean when you come back home from work or, if you have a night electricity plan, you can even program the washing machine during night to reduce consumption.
Life is the sum of these moments that surprise us.
